Fundamentals

Fundamentals

```
using System;

namespace CSharpCourse.Fundamentals.Demo
{
    public class Demo3
    {
        public static void Run()
        {
            Console.Write("Enter your height: ");
            string answer = Console.ReadLine();

            decimal height = decimal.Parse(answer);

            if (height < 0)
                Console.WriteLine("You can't have negative height");
            else if (height > 200)
                Console.WriteLine("You are higher than 2m" );
            else
                Console.WriteLine("You are lower than 2m");
        }
    }
}
```

Fundamentals

1 Respond to user input

Create the following console app:

```
C:\WINDOWS\system32\cmd.exe
What is your name? Maria
How old are you? 26
What is your favorite letter? e

Thank you!

Your name is: Maria
You are 26 years old
Your favorite letter is e

Press any key to continue . . .
```

The program should ask the user for his/her name, age, and favorite letter. Then respond to the user (the green part). Use strings all the way.

Hint

Try

```
string myVariable = Console.ReadLine();
Console.Write("Some text");
Console.WriteLine("Some text");
Console.ForegroundColor = ConsoleColor.Red;
int.Parse(...)
char.Parse(...)
```
