Module

Methods

Methods

```
Console.Write("When did you start working in the morning? ");
string startString = Console.ReadLine();
TimeSpan start = TimeSpan.Parse(startString);

Console.Write("When did you go for lunch? ");
string lunchString = Console.ReadLine();
TimeSpan lunch = TimeSpan.Parse(lunchString);

Console.Write("When did your lunch end? ");
string lunchEndString = Console.ReadLine();
TimeSpan lunchEnd = TimeSpan.Parse(lunchEndString);

Console.Write("When did you go home from work? ");
string endString = Console.ReadLine();
TimeSpan end = TimeSpan.Parse(endString);

Console.WriteLine();

TimeSpan worktime = lunch - start + end - lunchEnd;

Console.WriteLine($"You have worked {worktime.Hours}h and {worktime.Minutes} minutes" );
```

Methods

```
TimeSpan start = AskForTime("When did you start working in the morning?");
TimeSpan lunch = AskForTime("When did you go for lunch?");
TimeSpan lunchEnd = AskForTime("When did your lunch end?");
TimeSpan end = AskForTime("When did you go home from work?");

ReportWorkingHours(start, lunch, lunchEnd, end);
```
